PROJECTS

Messenger Chrome Extension

2017

- This angular powered extension aims to facilitate the action of chatting with your friends online without having to switch tabs. This means that you will be able to watch your favorite Youtube video while chatting with your friends, all without having to switch tabs.

Slack Scheduler bot

2017

- The Slack Scheduler bot allows users to command a bot to create google events which sends invitation to all members involved in the event. The bot was created to ease my team's organization for scrum meetings. I would be able to create a google event with a date and time and all relevant members through the bot.

ConUHacks II, Hackathon, Montreal, QC

2017

- The bot was built with node.js. We use the Twitter Streaming API to listen to the hashtags and the REST API to reply to users. The Watson Alchemy Language API is used to analyse the text in a tweet and the Clarifai API is used to analyse pictures to help users find what they are looking for.
- Top 5 Nominee.

ConUHacks I, Hackathon, Montreal QC

2016

- Designed an android app that implements the Clarifai API and the Dropbox API in a team of 4. This app does image recognition and sorts the images with similar traits. It then stores the result on the cloud. Contributed in making the sorting algorithm that matches images with similar characteristics.
